-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-4 and 7** are rejected under 35 U.S.C. 102(b) as being anticipated by Hayes (US 5589400).

Hayes discloses a container assembly for treating biological samples in cytocentrifuges. The container comprises a vertical flat supporting base (12), a wall protruding at right angles from the supporting base (20), at least one funnel (22) supported by the wall and provided in a lower region thereof with a corresponding horizontal connection channel (44), a slide (16), and a filtering card (Col. 1, Lines 47-49). The support (18) being formed from a single element made of molded plastic material, such as polyethylene (Col. 5, Lines 19-21). The support (18) comprises of a flat supporting body provided with protruding edges (See Fig. 1), clamp means (24) at said edges and made integral therewith for accommodating and retaining, in succession, the slide, the filtering card and the base of the container. The support further includes a transverse pivot (56) protruding from said supporting body and made as an integral part thereof for fixing the support to a centrifuge. (See Figure 1)

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. **Claims 5 and 6** are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayes in view of Wendt. (US 4209923)

Refer above for the teachings of Hayes.

Hayes fails to teach containment tabs.

Wendt teaches a slide holder. The slide holder comprises of integrally formed two mutually flexible retaining springs/hooked-shaped tabs. (Col. 3, Lines 10-11)

It would have been obvious to one of the ordinary skill in the art to modify the support of Hayes to include containment tabs/hooked-shaped tabs in order to securely and firmly hold the slide, the filtering card and the supporting base of container.
